

Project Profile: 2008-2009 Hyatt Regency Hotel Renovations

Project Budget: \$ 13.35 million

Project Summary:

Advanced Architecture and Planning served as both the Architect of Record for the project, and the Project Manager.

In addition to providing Architectural design services, we served as the Owner's primary representative in charge of managing numerous consultants, and contractors, and to manage the project budget, and schedules.

We served as the Construction Manager responsible for determining project phasing, bid packaging, contract management, and overseeing the construction phase of the project..
